Our Speaker

Prof. Dr. Dr. Bilal Al-Nawas

Professor Dr. med. Dr. med. dent. Bilal Al-Nawas

Full time Professor and Medical Director at the Department of Oral, Maxillofacial and Plastic Surgery at the J. Gutenberg University of Mainz. Since September 2009 Adjunctive Associate Professor at Kyung Hee University School of Dentistry, Seoul, Korea.

Graduated in Dentistry and Medicine and affiliated to the University of Mainz for more than 15 years. He focus mainly in clinical and scientific aspect of dental implantology and is active in clinical studies and basic research.

His Clinical workfields are compromised patients with risk factors or local bone deficiency, including tumour and cleft reconstructions.

He published over 100 publications in peer reviewed journals. He is a Fellow of the ITI Section Germany and Education Delegate. In 2006 & 2010 he was awarded: “Best Teacher at the Medical Faculty”. Since 2012 he is speaker of the University Medical Center Focus: BiomaTiCS – Biomaterials, Tissues and Cells.

Synopsis

From securing removable prostheses to replacement of a single tooth, dental implants have provided a means for a higher standard of patient treatment.

Today’s patients not only want tooth replacement for function, but also expect an esthetic result that will blend into the remaining structures of teeth soft tissue and the bony contours.

This course is designed for general dentists who wish to have a basic knowledge of dental implants and who also wish to provide dental implant therapy as a treatment modality to patients. General dentists will have a clearer overview of dental implant teeth replacement and its workflow.

Lecture Topics

Implants in Esthetic Zone

Socket Preservation

Staged Approach

Immediate Implants

Implant timing,

Implant position

Loading protocols

Complex case solutions

Essentials in successful implant dentistry advocating patients
